

Delaware Database for Funding Resilient Communities

RASCL(Resilient and Sustainable Communities League)

RASCL is a collaborative network of state, nonprofit, and academic partners working to create a more resilient and sustainable Delaware for all communities.

- Foster collaboration, networking, and inclusive partnerships between resilience practitioners, community members, decision-makers
- Develop and promote tools, best practices, and training to support equitable adaptation, community resilience, and sustainability
- Conduct and support research and analysis to help inform planning and policy Decisions
- Provide expertise, planning, and other forms of technical assistance to communities
- Identify and promote funding resources to support community projects in Delaware related to RASCL's core issues

RESILIENCE FUNDING DATABASE

The Delaware Database for Funding Resilient Communities was created by Dr. Phillip Barnes and the team at the University of Delaware's Institute for Public Administration (IPA), with support from Delaware Coastal Programs, they have compiled relevant financial assistance programs into a searchable web database. This database can be used by communities to support climate change adaptation and resilience projects in diverse areas of

- Disaster preparedness
- Infrastructure upgrades
- Stormwater Management
- Vulnerability assessments
- Disaster recovery
- Emergency aid
- Energy conservation
- Habitat restoration
- Planning
- Education

RESILIENCE FUNDING DATABASE

To access the Delaware Database for the Funding Resilient Communities you can directly go to these links:

PROJECT GUIDANCE GROUP

Serving Delaware communities needing technical assistance and advice to initiate or complete resilience-related projects. The group is staffed by RASCL-affiliated experts who are lending their time and assistance in an advisory capacity.

<https://www.derascl.org/project-guidance-group>

How to keep the information up to date in the future?

Financial assistance programs are available to support the implementation of projects to prepare for storms and sea level rise. Thus, it is important to keep the database continually updated as new programs emerge and others retire. If entries require new content or contain errors, or if you wish to add a relevant program, please contact.
